Leptospira grippotyphosa Polyclonal Antibody (LG PAb) - Lot ID IRP 511-04

Document Number: CVB-DAT-0098 Revision: 02

Previous Number: BBDAT0119.04

Vault: CVB-Released

Section/Area: CVB-DAT

Effective Date: 24 May 2021

Notes: Strain or Source: Rabbit origin anti-LG serum, Fill date: December 1,

2004

Title: Leptospira grippotyphosa Polyclonal Antibody (LG PAb) - Lot ID IRP 511-04
Release Date: 24 May 2021 Author: AMWALKER Document Number: CVB-DAT-0098.02
CONTROLLED//PROPIN//BASIC

United States Department of Agriculture Animal and Plant Health Inspection Service Center for Veterinary Biologics P. O. Box 844 Ames, IA 50010

- 1. Reagent Name: Leptospira grippotyphosa Polyclonal Antibody (LG PAb)
- 2. Strain or Source: Rabbit origin anti-LG serum
- **3. Lot Number:** IRP 511-04
- 4. Fill Date: December 1, 2004
- **5. Expiration Date:** April 30, 2023

Precautions: There are no known hazards associated with the use of this reagent.

- **6. Intended Use:** For use in an enzyme-linked immunosorbent assay (ELISA) as described in **Supplemental Assay Method (SAM) 626** for serial release potency testing of leptospiral bacterins containing serovar *grippotyphosa*. This reagent may also be used in the microagglutination test.
- 7. **Instructions for Use:** Dilute LG PAb 1:10,000 in carbonate-bicarbonate coating buffer and use immediately, according to **SAM 626**.
- **8. Test of Reagent:** LG PAb has a serologic titer of $\geq 1:12,800$ against *L. grippotyphosa* antigen by the microagglutination test (MAT). MAT titers against other serovars are negligible. The optimal use dilution was determined by titration, using the assay described in **SAM 626**.
- **9. Container Size, Type, Weight, or Volume:** 150 μL aliquots in plastic microcentrifuge tubes.
- **10. Storage Conditions:** -20° to -80°C for long-term storage. Vial may be held at 2°- 7°C for several weeks.
- **11. CVB Technical Contact:** Bacteriology Section, Center for Veterinary Biologics, (515) 337-7020 or FAX (515) 337-7673
- 12. Origin and Passage History: Not applicable.

13. Method of Preparation: LG PAb was prepared by hyper-immunizing New Zealand white rabbits with heat-inactivated whole cells of NVSL *L. grippotyphosa* challenge strain 11808, followed by an injection of viable whole cells. Individual rabbit sera were tested by the MAT. Satisfactory sera were pooled, filtered, and frozen at -20°C or lower.

14. Other: None.

Reagent orders and feedback should be sent *including phone number* to the following email address: <u>VS.DB.CVB.Reagent.Requests@usda.gov</u>

Reagent orders forms (APHIS Form 2018) can be found on the CVB website.
